Cookie Policy

Every cookie Asynchrone Space sets, and why no consent banner is shown today.

October 29, 2026 · Asynchrone Space · asynchrone.space/legal/cookies

What this policy covers

Asynchrone Space sets a small number of first-party cookies, all of them strictly necessary to sign you in or to remember a display setting you chose. None of them follow you across other sites, and we set no third-party cookies.

The cookies we set

This table lists every cookie the product currently sets.

Cookie	Set by	Purpose	Type	Duration
__Secure-better-auth.session_token (better-auth.session_token outside production)	Customer app	Keeps you signed in. Signed and httpOnly, so scripts cannot read it.	Essential	7 days
asynchrone-space-control-tower.session_token	Control tower (internal staff only)	Keeps an operator signed in. Host-only: it is never sent to the customer app.	Essential	4 hours
NEXT_LOCALE	Customer app	Remembers the language you picked so the next page opens in it.	Preference	Until you close the browser
sidebar_state	Customer app	Remembers whether the navigation sidebar is expanded.	Preference	7 days

During a GitHub or GitLab sign-in the app may also set short-lived cookies to carry the OAuth state and protect the callback against cross-site request forgery. They are deleted when the sign-in completes.

Browser storage that is not a cookie

Your appearance settings — theme, text size, motion and contrast — and your recently opened items are kept in your browser's local storage under keys beginning asynchrone-space.appearance and asynchrone-space.recents. They never leave your device and are removed when you clear site data.

We do not use fingerprinting, and we do not write to local storage for advertising purposes.

No analytics and no advertising

There are no analytics, advertising, A/B testing or third-party tracking cookies in Asynchrone Space today. We do not embed pixels or tags from advertising networks.

Because every cookie we set is strictly necessary or a display preference you chose, we do not show a consent banner. If we add analytics or any other non-essential cookie, we will publish the consent banner and update this policy first, and the cookie will not run until you agree to it.

Managing cookies

You can control or delete cookies through your browser settings. Blocking the session cookie prevents sign-in, and clearing site data resets your appearance settings and recent items.
